

CB for Windows

for the RT-6100/TS-610

Stay connected with the patients from a remote location.*1
NIDEK CB for Windows will improve the flexibility and efficiency of your operation.

Expanding possibilities,

enhancing refractions

CB for Windows is optional control software for the Intelligent Refractor RT-6100 and the Tabletop Refraction System TS-610. This software delivers the comprehensive examination capabilities of the existing control console through a Windows computer.

Experience the advantage of new possibilities provided by NIDEK.

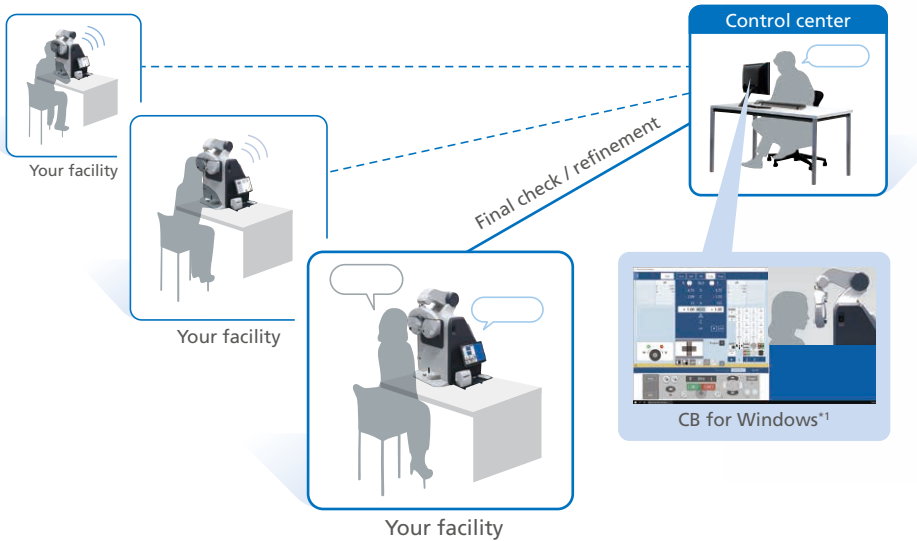

Control software for the RT-6100/TS-610

Featuring a highly visible measurement screen and digital keypad on the computer display, the lens exchanges are as seamless as using a control console. Practical functions are available including pre-programmed refraction settings for consistent and reliable examinations.

Expanding possibilities, streamlining workflow

CB for Windows enables remote examinations by using functions or software*1 through a Windows computer to control the equipment remotely. Combined with the Fully Assisted Refraction System FARS*2, a patient checks with subjective refraction to achieve the full correction values in a facility then the eye care professional provides the final check / refinement remotely.

*1 Operation from a different location can be performed by remote operation of the computer. NIDEK does not include or provide the functions or software necessary for remote communications. The working environment and the specifications/performance of individual computers may impact software usability.

*2 Product/model name: Fully Assisted Refraction System FARS

Selectable user interface

The operator can choose between using the standard control console or a computer/tablet by using CB for Windows.*3 Explore the possibilities.

*3 Control console and Windows computer/tablet cannot be used/connected simultaneously.

CB for Windows specifications

Software	RT-6100 CB for Windows (installation CD)
Standard accessories	License key
Compatible devices	RT-6100, TS-610
Optional accessories for TS-610	Control box tray, Tablet attachment

CB for Windows system requirements

Operating system	Windows 10 (32-bit/64-bit) or Windows 11 (64-bit)
